

# Level Switches

Hawkeye Industries Inc. offers an array of single-point level indication products ideal for level alarms, emergency shut downs, pump start / stop and any other application that requires activation based on tank fluid level.

## Electric Gauge Board Switches

The EXA-AR is a gauge board-mounted electrical switch, activated by the traversing indicator. Mounted externally, the gauge board switch not only offers simple set-point adjustment and easy maintenance and installation, but also requires no additional tank nozzle connection. The EXA-AR can be installed before or after gauge board installation, and come standard with a whisker trigger.

## Pneumatic Gauge Board Indicator Switches

The Hawkeye pneumatic switch is a 2-position 3-way device. It comes standard with magnetic mounting bracket and whisker trigger. The magnetic bracket offered flexibility in mounting and simple set-point adjustment, while the long whisker ensures the indicator fully throws the switch.
