

Level Indication > Liquid Sealed

Model 375 LS

The Hawkeye Model 375 is a low-profile, sour service gauge head that is intended to be used in situations where the Model 750 LS is too tall. This problem commonly arises on rental tanks where tall appurtenances are knocked off or damaged during transportation.

Model 375 LS Gauge Head

Design

Low Profile

- ▶ Under 5 in. in height
- ▶ Sits below most tank roof peaks
- ▶ Reduces transport damage

Patented Energised Liquid Seal

- ▶ Same proven design from Model 750 LS
- ▶ Superior performance over grease-packed competitor models

Close Cable Tolerances

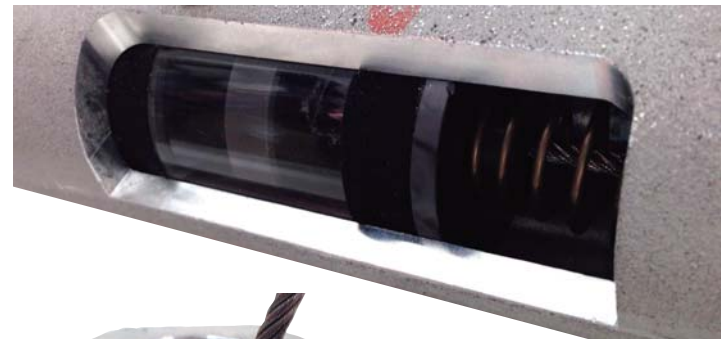

- ▶ Tight tolerances prevent the cable from 'jumping' and interfering with operation.

Construction

- ▶ Body: High Strength Cast Aluminum Alloy
- ▶ Seals: Viton
- ▶ Internals: Moly Nylon and 316 Stainless Steel.

Flexibility

- ▶ No Adapters Required – replace existing 3/4 NPT gauge heads with the Model 375 LS with ease
- ▶ Standard, 1-1/2 NPT thread available for stronger connections on new-build tanks
- ▶ Optional 1/4-20 UNC mounting point on cable outlet end for additional bracing.

Integrated Liquid Seal cartridge cutaway (above)

Dual 1-1/2 M-NPT and 3/4 F-NPT Mounting Options (left)

Ordering Information
