

LEVEL INDICATION | COMPONENTS

HI VIZ WRAPAROUND INDICATOR

Features

- Provides external indication of tank liquid level.
- High Visibility Yellow.
- Designed to work with most Hawkeye Gauge Heads and Floats.
- Stocked for quick delivery..

FEATURES

Tank Level Indication

- The wraparound indicator provides external level position of the float inside the tank.
- When coupled with a graduated gauge board, the indicator can report the volume of liquid in a tank.

Wraparound for a lower-cost alternative

- The Hawkeye wraparound indicator provides a lower-cost solution when the better reliability and all-weather operation of a guided indicator isn't required.
- The indicator runs along the Hawkeye gauge board, using the gauge board itself to guide the indicator.
- The wraparound indicator kit includes indicator and top roller bracket.

High Visibility Yellow

- Durable powder coating provides a high visibility protection against scratches and corrosion for long operational life.

Designed to work as a System

- Hawkeye wraparound indicators are designed to work in concert with Hawkeye floats and gauge heads.
- The wraparound indicator is not recommended for use with the Model 1000 Redtail and Model 1500 Roadside gauge heads.

OEM Nameplate options

- Customized nameplates for tank fabricators available. Contact us for more information.

ORDERING INFORMATION

Wraparound indicators are best ordered as part of a complete level indication system, which also include:

- Gauge Head
- Float & Guides
- Gauge Board

Standalone Wraparound Indicator Kit

Most configurations are stocked for quick delivery.

EIWA - 0 0 0 0

Examples	
Wraparound Indicator Kit, Standard	EIWA-0000

NOTE: The wraparound indicator requires the use of a Hawkeye gauge board.
